

# World News:

## Antarctica and the 2041 foundation

Today's topic is all about Antarctica and the 2041 foundation. The 2041 foundation is a group led by Robert Swan, that is on a very important Mission to save Antarctica!

The government are trying to make a big decision about what to do with Antarctica. They can either destroy it to build energy sources on it or keep it the way it is, which is what we want! In champions of the world club, we are going to learn about champions of Antarctica and what it is.

This group will be led by Geography Club, who already know a lot about this topic so they will be able to tell you a lot of facts! Hopefully you have watched the year 5 geography club assembly and done the penguin competition!

Each week we will learn about a different topic which you will learn about and complete different activities about.

You can come to champions of the world club whenever you want.

We will do fun activities and learn amazing facts each week all about different topics!

# Activity Time:
