

Antarctica 2041

Legend
Not US IPY

2041 School

- ▶ Hello I am from the 2041 club
- ▶ Antarctica is a continent

Where is Antarctica ?

- ▶ As you can see Antarctica is South (bottom) of the map!

Continents

A continent is **one of Earth's seven main divisions of land**. The continents are, from largest to smallest: Asia, Africa, North America, South America, Antarctica, Europe, and Australia.

What makes Antarctica so special?

- ▶ Antarctica is special because :
- ▶ it protects us from the heat
- ▶ It last piece of pure wild life
- ▶ also it depends on our future
- ▶ Click the link below:

Climate change

- ▶ It's the 11th hour sea levels are rising , temperatures are stifling and less trees are being planted
- ▶ This is due to climate change

Did you know...

Squirrels forget where

They burry there nuts

And therefore 300

Trees are planted a year !

Go squirrels !!!

The earth's climate has seen many changes in its 4.55 billion years. For example, 18,000 years ago most of Britain was covered in ice and glaciers. Although changes to the earth's climate are natural, current changes are a result of increasing human populations and activities.

When talking about climate change in relation to human activities climate change can be said to mean -

'the build-up of man-made gases in the atmosphere that trap the sun's heat, causing changes in weather patterns around the world'.

What can we do to help?

- ▶ Eat seasonally 😊
- ▶ Reduce ,Reuse and Recycle 😊
- ▶ FIX old and broken toys 😊
- ▶ And remember if your pen runs out there is a pen box in four oak 😊

Conclusion

- ▶ In conclusion it is EVERYONE'S duty to protect it
- ▶ It is EXTREAMLY special and IMPOTANT
