St Anselm's Multiplicative Facts Progression Map 2024-2025

Intent

At St Anselm's we believe that it is important that children are given the opportunity to see, explore, and understand the mathematical structures and patterns of times tables for deep, embedded learning. We want our children to know their times tables fluently and be able to apply these facts (and their inverse - up to 12x12). Being fluent in times tables facts means that working memory is freed up and leaves space to explore new mathematical ideas and solve more complex problems.

Year 1 Count in multiples of 2, 5 and 10.	**Year 2** Know facts for 1x, 2x, 5x and 10x table – commutative and inverse. Count in multiples of 3.
Year 3 Know facts for 3x, 4x and 8x tables - commutative and inverse.	**Year 4** Know facts for 6x, 7x, 9x, 11x and 12x – commutative and inverse.
Year 5 Know facts for all times tables 12x12 – commutative and inverse. Squared numbers and square roots. Multiply and divide by powers of 10.	**Year 6** Cubed numbers and cube roots.

<tr>
<td>All multiplication and division facts mixed up to 12x12

Multiplying single digit numbers by 10, 100 and 1000.

Dividing up to 4 digit numbers by 10, 100, 1000.</td>
<td>Revision of all x tables;
mixed up, using related multiples of 10/100/1000

Eg.
20x4
4x600
70x50

Children should already know facts when shown as 2x2 or 9÷3 etc. Focus on language and symbol for squared and square root
Include;
$13^2 14^2 15^2$</td>
<td>Revision of all x tables;
mixed up, using decimals eg. tenths, hundredths, thousandths

Eg.
3x0.7
0.08x2
0.4x0.6</td>
</tr>
</table>

St Anselm's Multiplicative Facts Progression Map 2024-2025

Year 6		
Autumn	Spring	Summer
Cube numbers and cube roots $1^3 = 1$ $2^3 = 8$ $3^3 = 27$ $4^3 = 64$ $5^3 = 125$ $6^3 = 216$ $7^3 = 343$ $8^3 = 512$ $9^3 = 729$ $10^3 = 1000$	Consolidation and revision	Revision

Ideas for implementation:

Building up skills:

Step 1 – 'Root facts'
Step 2 – 'Root facts' mixed up so no longer relying on patterns
Step 3 - Introduce tougher time restraints to encourage rapid recall (where appropriate)
Step 4 – 'Root facts' and inverses
Step 5 – 'Root facts' and any linked facts such as multiples of 10 or 100
Step 6 – Missing number problems
